**ELECTRONIC MASS FLOW CONTROLLERS**  
**Series A810**

**DESCRIPTION**

The Series A810 electronic mass flow controllers are compact, self-contained units designed to indicate and control a set flow rate of gas. They are unaffected by temperature and pressure variations within specified limits. The mechanical layout of the design includes an LCD readout built into the top of the transducer. This readout module is tiltable over 90 degrees to provide optimum reading comfort. The readout is connected by a standard modular plug, and is readily removable and extended for remote reading installations. Units are available in aluminum or stainless steel.

**FEATURES**

- Rigid metal construction.
- Maximum operating pressure – 1000 psig.
- NIST traceable calibration certification.
- Built-in set point control.
- Leak integrity $1 \times 10^{-9}$ sccm helium.
- 0-5 VDC or 4-20mA signals.
- Built-in tiltable readout display in some models.
- Circuit protection.
- Totalizer option available.
- 50 $\Delta P$ max.

**SPECIFICATIONS**

Accuracy:  
±1.5% of full scale, including linearity for gas temperatures of 59°F to 77°F and pressures of 5 to 60 psia

Repeatability:  
±0.5% of full scale

Response time:  
Generally 2 seconds to within ±2% of actual flow

Temperature coefficient:  
0.15% of full scale/˚C

Pressure coefficient:  
0.01% of full scale/psi

Maximum pressure drop:  
1.06 to 8.0 psid depending on flow range

Maximum pressure differential:  
50 psi

Gas and ambient Temp:  
41˚ to 122˚F

Output signals:  
Linear 0-5 VDC (1000 ohms min load impedance) or 4-20 mA (0-250 ohms loop resistance)

Transducer input power:  
11-26V; 800 mA

Materials in fluid contact:  
Aluminum units: anodized aluminum, 316 SS, brass, Viton o-rings  
Stainless steel units: 316 SS and Viton o-rings

Attitude sensitivity:  
No greater than + 15 degrees from horizontal to vertical:  
Standard calibration is in horizontal position.

Connections:  
1/4" compression fittings. Higher flow rate units may have different connections.

Leak integrity:  
$1 \times 10^{-9}$ sccm of helium maximum to the outside environment

CE compliant:  
EN 55011 class, class B: EN50082-1
